

Game Jamming

Faster, Weirder, Better With Procedural Generation

Best Levels Played So Far

Say Hello!

#whatis X Y - Ask me what the thing is at those co-ordinates!
#whatgame - Ask me what game I'm working on right now
#whatsnext - Ask me what things I'm working on this week

Status

I've been working for 0 hours and 0 minutes!

I'm currently designing levels for a game I'm making. This session, I've played \$LEVELS\$ levels, and made over \$MOVES\$ moves!

If you're interested in my games, you can play and download them online:

```
//explain what a procedural  
//generator is here  
procedural generators;  
are bits of code();  
that make things;  
//TODO: slide art
```

**Generating things isn't
about code, though - it's
a unique creative skill!**

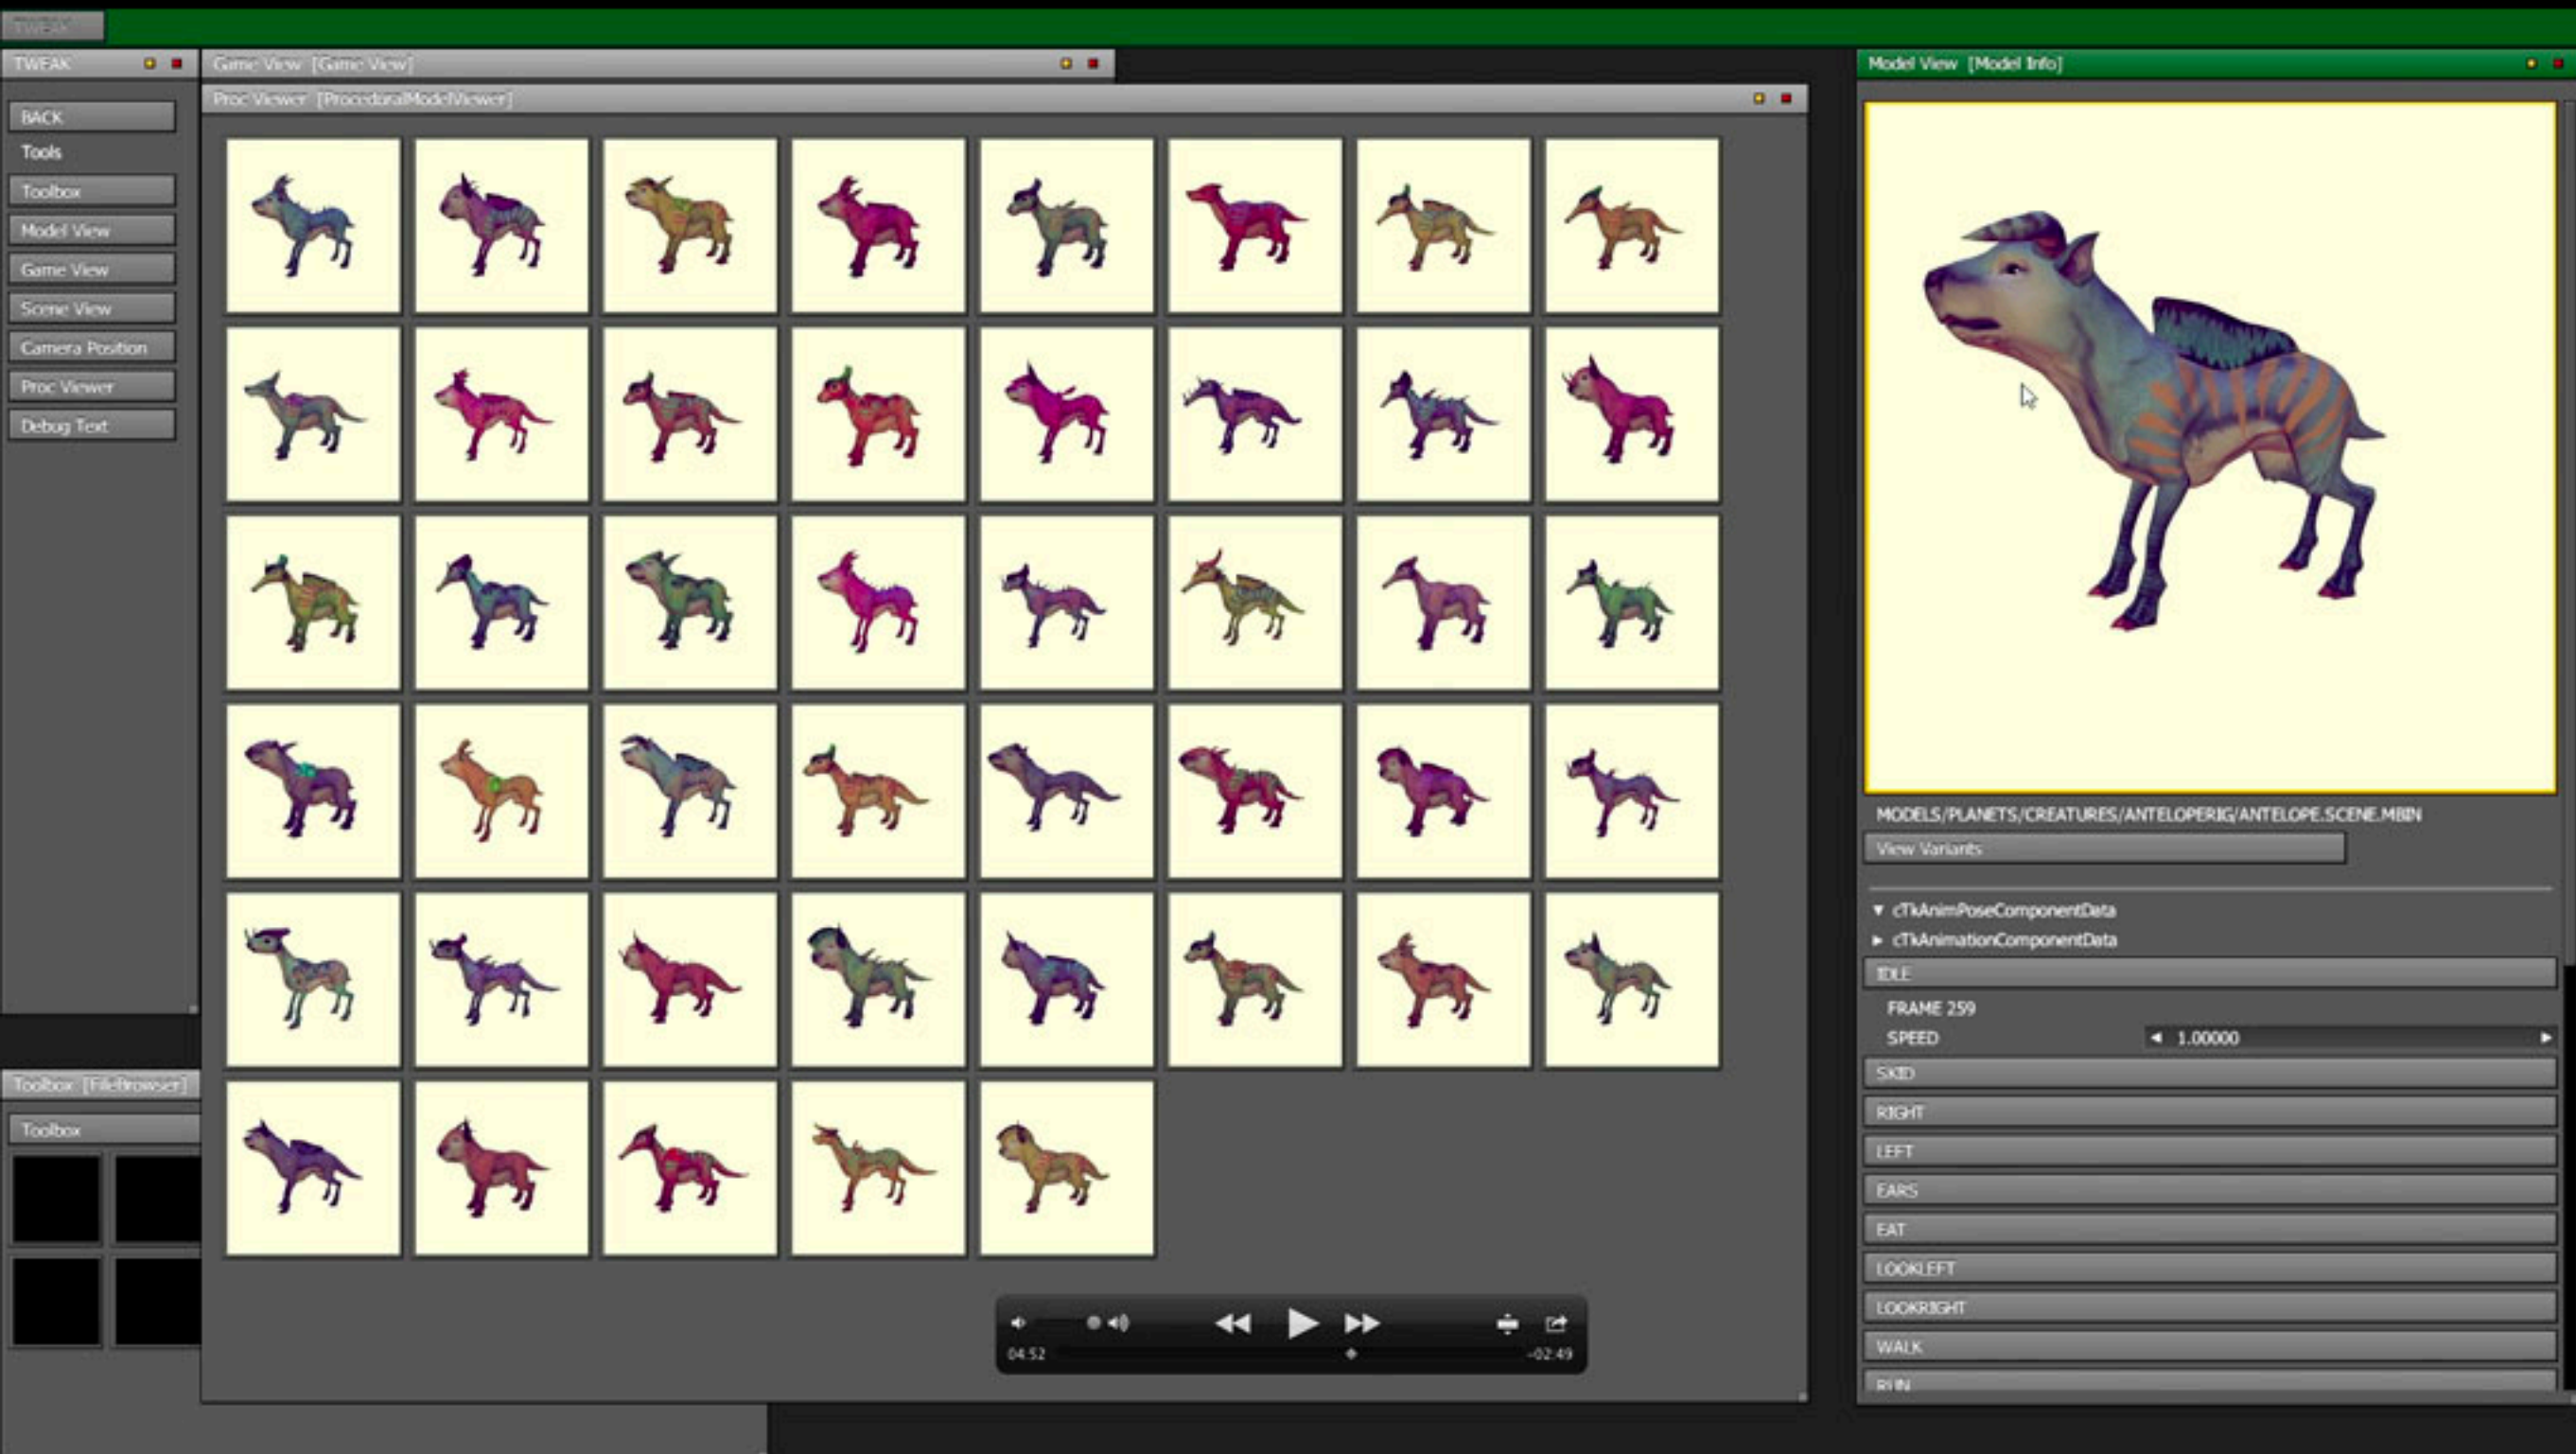

IMG: Saskia Freeke (@sasj_nl)

**Some
generators
perform
finishing touches**

**Other generators make
lots of decisions**

**Procedural generation can
sound really complicated**

**And you can even
use it in a game jam!**

IMG: Manfred Mohr (1979)

KID KOZMIK

Procedurally generated colour schemes
using ideas from colour theory

KID KOZMIK

Procedurally generated colour schemes
using ideas from colour theory

Random Access Character

Glued random 3D models into the shape of characters,
animated with a bunch of random walk cycles

65

2

Get 1 mana
10 times.

Get 1 mana
50 times.

1

Quarter jostling for
a random red soldier.

Half speed for a
random blue soldier
for each extra-strong
soldier.

1

Bestow fear
each blue
soldier.

1

Spawn a
new blue
soldier 10
times.

1

Twofold health for
a random red
soldier 100 times.

Twofold attack
power for a random
red soldier for each
near-death soldier.

Chaos Witch

Randomly generated rules which the player can
choose from to affect the game's outcome

Kai

If we burn each other, we're only making ourselves more delicious for that thing.

DEAD

DEAD

Xeno Friends

Procedurally generated dialogue from individual lines tagged with special rules

**Game jams
are mostly
about
moving
forwards.**

Whatever you do,
make it **additive**

Quick Tips For Jamming With Generators

#1. Always have
an escape route

What is the worst possible
thing my generator can do?

What would the player need
to get out of it?

#2. Let people play
with your generator

**Let players
share your fun**

**A button they can press to
regenerate things**

**A way to recycle things they
don't like to get new ones**

**Direct control over the rules
that govern the generator**

Total control?

#3. Let it get

WIERD

Where are the limits?
Why are they there?

#4. What If It's
Really Broken?

- + Generate 1000 things
- + What percentage of them contain X?
- + What percentage of them fail a test?

#5 What If It's Actually
Really Badly Broken?

One word: *filters*

If you know what you want,
just keep trying until you get it

Generate [thing]

Is [thing]
bad?

Yes

No

Use it!

**Procedural generation is
amazingly fun**

IMG: Saskia Freeke (@sasj_nl)

**You can generate almost
anything**

IMG: Manfred Mohr (1979)

**Remember: be bold, be
weird, be experimental**

THANKS!
